If using illustrations from published sources, it is necessary to have a written permission of the copyright owner. Source should be stated below the table, graphs and images. Citations within the specified sources are provided in the same way as in the text. If the tables, charts and figures are the result of the author's work, it should also be emphasized.

STATISTICAL DATA - Results of statistical tests should be given in the following form: $F(1,9) = 25.35$; $p < 0.01$, or the like. Lower number of conventional P levels should also be indicated (for example, 05, 01, 001).

BIBLIOGRAPHY- The Journal uses Chicago Style Citation. Chicago Style Citation is used in scientific and research papers. Chicago style is named after the Chicago guide, developed at the University of Chicago in 1891. Chicago style contains precise instructions for the use of literature. Chicago Style has two text editing systems. The first style is the style of notes, footnotes, and the other one is the style of CSE or scientific style or format. CSE style (i.e., the author-date system) has long been used by those in the physical, natural and social sciences. In this system, sources are briefly mentioned in the text, usually in parentheses, by author's last name and date of publication. Short citations are emphasized in the list of references, where the complete bibliographic data are provided. The part referring to the bibliography should be typed single-spaced with complete information and must start on a new page according to the author date system, the surname [comma] name [full stop]. When giving the titles and publishing dates,

parentheses is not used. The year of publishing is given after the name of the author. The names of all authors / editors are all included /up to 10 names. For more than 10 authors, the et al. When citing several authors, use the word "and". The authors of papers, books and other materials, without authors or editors, such as government documents, newsletters and journals, are listed in alphabetical order. Most of the references listed in the bibliography should be included in the text.

APPENDIX - In the appendix there should be only the descriptions of material useful for readers to understand, assess or review the research.

FOOTNOTES AND ABBREVIATIONS - It is recommended that the text should **NOT** have footnotes or abbreviations. Abbreviations should be avoided, unless they are very commonly used. The abbreviations stated in tables and pictures should be explained.

REVIEWS AND PUBLISHING - All papers are reviewed by two anonymous reviewers. On the basis of the reviews, the Editorial Board makes a decision on paper publishing in the journal "Business Studies" and notifies the author. If the reviewers do not agree, the Editorial Board accepts the review by the reviewer of the higher academic title when deciding on the classification of paper. If the reviewers are of the same title, the decision is made in favor of the author. According to the instructions, reviewers can point to possible violations of ethical norms in the paper. In this case, the paper is dismissed.

Since the journal "Business Studies" is international, when validating the subject matter and its importance for researchers and readers, the standard of geographical distribution of the authors will be sought. The number of foreign authors should be over 50%.

The author provides a written statement on the authenticity of his work.

An author or co-author can be the author or co-author of maximum one paper in one issue of the journal. In order to present the scientific research papers of a larger number of researchers, the author who published a paper in the previous issue of the journal cannot submit the text for publication in the next issue of the journal. The author (first author) receives a copy of the Journal in which her/his paper is published. Only the papers that have fully complied with the above instructions will be sent for review. Papers are anonymously sent to reviewers.
